HABS  
UTAH  
23-WEN,

The western edge of the major buildings extant at Wendover Air Force Base, the L-shaped Swimmer's Bath House enwraps the Swimming Pool (building 101) along the pool's north and west sides. Designated a recreational facility of "Mobilization", "Temporary" construction type, the bath house was not built as depicted on the September, 1944, base map. Instead of wrapping around the northeast corner of the pool, as drawn, it actually surrounds the northwest corner, perhaps to provide a windbreak to protect against the prevailing air currents from the northwest.

Built in 1944 at a cost of \$2295.80, the bath house contains 912 square feet of space. The west leg of the ell measures 51 feet 6 inches by 6 feet with a 15 feet by 12 feet offset structure at the end. The north leg of the ell is 53 feet-6 inches by 6 feet with an identical 15 foot by 12 foot structure at the east end. The two long, narrow wings are divided into small dressing, shower and lavatory rooms.

The bath house is a one-story, wood frame structure with a concrete floor, horizontal wood siding and asphalt roll roofing on a shed roof. It has small, horizontal windows along the tops of the walls. Interior fixtures include four water closets, three lavatories, four urinals, five showers, and fourteen incandescent lights, plus a hydrant-type fire extinguisher. Although its doors are missing, the bath house appears to be in sound condition.
